

Tool Scoot – Heavy-Duty CNC Tool Holder Storage by Uratech

[Tool Scoot](#) - Heavy-Duty CNC Tool Holder Storage by Uratech

When precision, mobility, and durability matter on the shop floor, Uratech's Tool Scoot stands out as one of the strongest and most reliable CNC tool-handling carts in the industry. Designed and manufactured in the USA, the Tool Scoot provides machine shops with a rugged, ergonomic, and highly mobile solution for transporting and organizing CNC tool holders of all major taper standards.

Engineered for All Major CNC Tool Holder Types

Uratech designs the Tool Scoot to be fully compatible with the entire range of CNC tool holders used across modern machining environments. Each unit accommodates:

- CAT Tool Holders
- BT Tool Holders
- DV & NMTB Taper Holders
- ISO Taper Holders
- HSK Tool Holders
- KM Tool Holders
- VDI Holders
- CAPTO Tool Holders

This universal compatibility ensures that shops operating mixed-machine environments can rely on one unified cart system for safe transport and efficient storage.

Built From Premium Cold Rolled Steel

The durability of the Tool Scoot starts with its material. Each unit is constructed from 3mm-thick cold rolled steel, providing exceptional rigidity and structural integrity. This robust foundation allows the Tool Scoot to comfortably withstand up to 4,000 lbs of weight capacity, making it suitable even for high-volume tool rooms and heavy production environments.

The entire structure is then powder coated, adding a smooth, corrosion-resistant, and chip-resistant finish capable of withstanding everyday industrial wear.

Heavy-Duty Industrial Castors for Smooth Maneuverability

To ensure mobility without compromising load capacity, the Tool Scoot is equipped with:

- 6.0-inch heavy-duty industrial swivel castors with brakes (2 units)
- 6.0-inch rigid castors (2 units)

This combination provides a stable, smooth transport experience while allowing operators to lock the cart securely in place during loading, unloading, or machine setup.

Durable Red Nylon Inserts for CNC Holder Protection

Inside the Tool Scoot, Uratech integrates its proprietary, high-strength red nylon inserts. These inserts feature a flange thickness of 8mm to 10mm, engineered to hold CNC tool holders firmly and prevent wear, chipping, or accidental damage.

The inserts are resistant to oils, coolant exposure, and daily handling, making them ideal for the harsh environments of modern CNC machining.

Ready to Use - Fully Assembled and Professionally Crated

To ensure a hassle-free experience for machine shops, every Tool Scoot is:

- Shipped fully assembled
- Securely crated on a pallet for safe transport
- Ready to use immediately upon unpacking

This eliminates setup time and ensures convenience, especially for high-volume facilities that need plug-and-play tooling solutions.

Why Choose Uratech's Tool Scoot?

- Designed and manufactured in the USA

- Supports all major CNC tool holder standards
- 3mm cold rolled steel construction
- Massive 4,000 lb load capacity
- Heavy-duty 6" castors for effortless mobility
- Industrial powder-coated finish
- Rugged red nylon inserts with 8-10mm flange for enhanced durability
- Ships fully assembled and pallet-crated

Conclusion

Uratech's Tool Scoot is a durable, high-capacity, and precision-engineered [CNC](#) tool handling solution built for real industrial performance. Whether your shop uses CAT40, BT30, HSK, CAPTO, VDI, or any other major taper standard, this Tool Scoot ensures efficient storage, safe transport, and long-lasting reliability.

Fast & Reliable Shipping Across North America & Worldwide:

At Uratech, we understand the importance of prompt and reliable delivery. We offer same-day shipping to customers in the USA, Canada, and Mexico, ensuring that your business operations remain uninterrupted. Additionally, we provide worldwide shipping, allowing industries across the globe to benefit from our high-quality storage solutions.

Stocked in New York, USA and Ontario, Canada for Immediate Availability:

Our warehouse in New York, USA and Ontario, Canada maintains an extensive inventory of CNC tool storage products. This ensures that our customers receive their orders quickly, reducing downtime and improving productivity.

Orders from USA and Mexico will be shipped and invoiced from Uratech USA Inc, 4947 Lockport road, #3, Lockport, New York, USA 14094

Orders from Canada and the rest of the world will be shipped from Uratech Tooling Technologies Inc, 142 Foamflower place, #21, Waterloo, Ontario, Canada N2V 0J1

About the Author

Uratech specializes in the design and manufacturing of CNC tool storage products and operates in two countries: in USA as Uratech USA Inc and in the Canada as Uratech Tooling Technologies Inc., We offer high-quality solutions to meet the needs of modern machine shops. Uratech is sincerely committed to providing customers with leading-edge technology.

Our primary objective is to meet or exceed customer expectations. We achieve this through efficient performance, quality workmanship, professionalism, competitive pricing, and on-time delivery. Above all, we emphasize the quality of work we deliver to fully satisfy our customers' needs. Products are stocked in New York, USA, and Ontario, Canada.

Orders from US and Mexico customers are shipped from Uratech USA Inc., New York.

Orders from Canada and all other countries are shipped from Uratech Tooling Technologies Inc., Ontario.
