

## Uratech Floor Model CNC Tool Cart: The Ultimate Tool Storage Solution

Uratech is a leading manufacturer and designer of CNC tool storage solutions tailored for the machining industry. Our robust Floor Model CNC Tool Cart is designed to accommodate various CNC tool holders, including CAT, BT, HSK, VDI, KM, and CAPTO holders. Crafted with precision and built to last, our Floor Model CNC Tool Cart combines high-quality materials with thoughtful engineering, making it an indispensable tool in any industrial workspace.

### Key Features of the Floor Model CNC Tool Cart

#### 1. Pegboard for Efficient Organization

The [Floor Model CNC Tool Cart](#) is equipped with a built-in pegboard that transforms your workspace by organizing essential tools in one convenient place. Pegboards provide a versatile and customizable storage solution, with holes to accommodate hooks, clips, and bins for accessories. Here's why the pegboard is essential for any machining operation:

**Quick Access to Tools:** The pegboard allows for easy organization of small tools, accessories, and components. Machinists can arrange tools based on frequency of use, reducing downtime and improving workflow.

**Enhanced Efficiency:** By having every tool within arm's reach, machinists can streamline their operations, reducing the time spent searching for specific tools.

**Reduced Risk of Tool Loss or Damage:** The pegboard helps organize tools neatly, minimizing clutter and keeping valuable tools protected and easily accessible.

#### 2. Cold-Rolled Powder-Coated Steel for Durability

Built to withstand heavy-duty industrial use, our CNC Tool Cart is crafted from cold-rolled steel, known for its strength and durability. This material is then powder-coated to provide extra protection against corrosion, scratches, and wear. The powder coating also enhances the tool cart's appearance, giving it a sleek, professional finish that withstands daily use in demanding environments.

Cold-rolled steel, combined with a powder coat, ensures a durable and long-lasting product that won't falter under the pressures of heavy industrial use, making it a smart investment for shops aiming for longevity and reliability.

#### 3. Red Nylon Inserts for Tool Protection

Our CNC Tool Cart features durable red nylon inserts specifically designed to protect your tool holders. Nylon, a resilient and flexible material, is resistant to wear and impact, offering a cushioning effect that prevents tools from rubbing against metal parts in the cart. Here's how the inserts contribute to tool longevity:

**Scratch Prevention:** Nylon prevents friction between tool holders and the cart's metal, protecting both the tools and the cart from scratches.

**Cushioning Effect:** These inserts help absorb vibrations and minor shocks, especially when the cart is in motion, ensuring tools remain secure.

**Enhanced Tool Life:** By reducing contact and wear on CNC holders, the inserts help extend tool life and maintain peak performance over time.

#### 4. Exceptional Storage and Weight Capacity

With an impressive capacity to store up to 70 tool holders, the Floor Model CNC Tool Cart is built for shops that demand both volume and durability. Its heavy-duty construction allows it to carry loads up to 4000 pounds, making it suitable for a wide range of applications. This capacity ensures that operators have everything they need on hand, without requiring multiple trips across the shop floor.

#### 5. Smooth Rolling Casters Designed for Industrial Floors

Mobility is a critical aspect of any tool cart, and our Floor Model CNC Tool Cart excels in this area. Equipped with smooth-rolling industrial casters, it glides effortlessly across a variety of surfaces. Whether on smooth concrete or rougher industrial floors, these casters provide reliable, consistent movement, allowing machinists to transport tools across the workspace with ease. Each caster is built to withstand the rigors of industrial use, ensuring durability and smooth movement, even when carrying heavy loads.

### Why Choose the Floor Model CNC Tool Cart?

**Comprehensive Tool Storage Solution:** With a pegboard, nylon inserts, and robust storage, it offers unmatched organization and protection.

**Enhanced Workflow:** Keep tools in one place, reducing time lost to searching and improving operational efficiency.

**Durability and Longevity:** Constructed from high-grade materials, this tool cart withstands the demands of everyday industrial use.

**Worldwide Shipping:** Uratech now ships globally, with a one-day shipping option available for customers in the USA, Canada, and Mexico.

### Fast & Reliable Shipping Across North America & Worldwide

At Uratech, we understand the importance of prompt and reliable delivery. We offer **same-day shipping** to customers in the **USA, Canada, and Mexico**, ensuring that your business operations remain uninterrupted.

Additionally, we provide **worldwide shipping**, allowing industries across the globe to benefit from our high-quality storage solutions.

**Stocked in New York, USA and Ontario, Canada for Immediate Availability :**

Our warehouse in **New York, USA and Ontario, Canada** maintains an extensive inventory of [CNC](#) tool storage products. This ensures that our customers receive their orders quickly, reducing downtime and improving productivity.

**Orders from USA and Mexico will be shipped and invoiced from Uratech USA Inc, 4947 Lockport road, #3, Lockport, New York , USA 14094**

**Orders from Canada and the rest of the world will be shipped from Uratech Tooling Technologies Inc, 142 Foamflower place, #21, Waterloo, Ontario, Canada N2V 0J1**

**About the Author**

Uratech specializes in the design and manufacturing of CNC tool storage products and operates in two countries: in USA as Uratech USA Inc and in the Canada as Uratech Tooling Technologies Inc., We offer high-quality solutions to meet the needs of modern machine shops. Uratech is sincerely committed to providing customers with leading-edge technology.

Our primary objective is to meet or exceed customer expectations. We achieve this through efficient performance, quality workmanship, professionalism, competitive pricing, and on-time delivery. Above all, we emphasize the quality of work we deliver to fully satisfy our customers' needs.

Products are stocked in New York, USA, and Ontario, Canada.

Orders from US and Mexico customers are shipped from Uratech USA Inc., New York.

Orders from Canada and all other countries are shipped from Uratech Tooling Technologies Inc., Ontario.
