

Uratech CAPTO C4 CNC Tool Holder Cabinet – Secure Heavy-Duty CNC Tool Storage Locker

The Uratech CAPTO C4 CNC Tool Holder Cabinet is a professional-grade CNC storage solution engineered for machine shops, precision machining facilities, and industrial manufacturing environments that demand secure, organized, and efficient tool management. Designed specifically for CAPTO C4 tooling systems, this heavy-duty CNC locker cabinet provides reliable protection for valuable cutting tools while improving productivity and workspace organization.

Manufactured using premium cold-rolled steel with a durable powder-coated finish, the Uratech CAPTO C4 cabinet is built to withstand demanding industrial applications. The fully welded construction eliminates the need for assembly and delivers superior structural stability for long-term use in busy CNC machining environments. With a high-capacity design capable of storing up to 105 CAPTO C4 tool holders, this industrial CNC tool cabinet helps reduce clutter and keeps tooling easily accessible for operators and maintenance teams.

One of the standout features of this CNC tool holder locker is its durable Sandvik red nylon inserts, designed to securely hold CAPTO C4 [tool storage cabinet](#) while minimizing wear, vibration, and accidental damage during storage. These precision inserts help extend tool life and maintain proper tool organization across production operations. The top two trays are inclined at 12 degrees, allowing quick visibility and ergonomic access to frequently used tooling.

The cabinet includes lockable front doors with clear acrylic viewing panels, allowing operators to visually inspect tooling inventory without opening the cabinet. This secure locking system protects high-value CNC holders from dust, chips, contamination, and unauthorized access while maintaining efficient workflow on the shop floor. Side pegboard panels provide additional storage space for consumables, accessories, gauges, and maintenance tools, helping maximize workspace efficiency.

Designed for industrial mobility and easy installation, the Uratech CAPTO C4 CNC tool cabinet features integrated forklift access and four heavy-duty eye bolts for crane lifting. These features simplify transportation and repositioning within manufacturing facilities. The cabinet is securely crated in a wooden shipping box to ensure safe delivery and protection during transit.

Its compact footprint makes it ideal for facilities looking to optimize floor space without sacrificing storage capacity. Whether used in aerospace manufacturing, automotive machining, precision engineering, or general CNC production facilities, the Uratech CAPTO C4 cabinet provides dependable industrial storage performance.

Key Features

- Stores up to 105 CAPTO C4 tool holders
- Heavy-duty cold-rolled steel construction
- Durable Sandvik red nylon inserts for tool protection
- Fully welded cabinet design with no assembly required
- Powder-coated industrial finish for corrosion resistance
- Lockable front doors with acrylic viewing panels
- Inclined top trays for quick tool visibility and access
- Pegboard side panels for consumable organization
- Forklift access for easy transportation
- Crane lifting eye bolts included
- Compact industrial footprint for optimized workspace usage
- Designed for CNC machining centers and manufacturing facilities
- Secure wooden crate packaging for safe shipment worldwide

Compared to conventional CNC tool carts and open shelving systems, this CAPTO C4 storage cabinet offers enhanced organization, improved safety, and superior protection for expensive CNC tooling systems. The reinforced steel frame, welded construction, and corrosion-resistant finish ensure durability even in harsh manufacturing environments.

Fast & Reliable Shipping Across North America & Worldwide

At Uratech, we ensure quick and reliable delivery to support uninterrupted machining operations. We offer same-day shipping across the USA, Canada, and Mexico, along with worldwide delivery for global customers.

Our products are stocked in New York, USA and Ontario, Canada, allowing faster order processing and reduced downtime for machine shops.

Warehouse Locations

USA: Uratech USA Inc, Lockport, New York

Canada: Uratech Tooling Technologies Inc, Waterloo, Ontario

About the Author

Uratech specializes in the design and manufacturing of CNC tool storage products and operates in two countries: in USA as Uratech USA Inc and in the Canada as Uratech Tooling Technologies Inc., We offer high-quality solutions to meet the needs of modern machine shops. Uratech is sincerely committed to providing customers with leading-edge technology.

Our primary objective is to meet or exceed customer expectations. We achieve this through efficient performance, quality workmanship, professionalism, competitive pricing, and on-time delivery. Above all, we emphasize the quality of work we deliver to fully satisfy our customers' needs. Products are stocked in New York, USA, and Ontario, Canada.

Orders from U.S. and Mexico customers are shipped from Uratech USA Inc., New York.

Orders from Canada and all other countries are shipped from Uratech Tooling Technologies Inc., Ontario.
