

50 Taper CNC Tool Cart – Bench Model | Compact Heavy-Duty CNC Tool Storage Solution

The Uratech 50 Taper CNC Tool Cart - Bench Model is a professional-grade CNC tool storage system designed for machine shops, manufacturing facilities, and industrial environments that demand organized, secure, and efficient tooling management. Built specifically for CAT50, BT50, DV50, ISO50, and NMTB50 tool holders, this compact bench-style tool cart offers exceptional durability, ergonomic accessibility, and reliable tool protection for modern CNC machining operations.

One of the key advantages of this CNC tool cart is its durable red nylon inserts. Each insert features a tapered inner diameter designed to securely hold CNC tool holders while preventing scratches, impact damage, and unnecessary wear. Proper tooling storage is critical in precision machining environments, and the protective insert system helps extend the lifespan of expensive tooling components while maintaining shop organization and operational efficiency.

The cart also features an ergonomic 15-degree inclined top tray that improves visibility and allows operators to access tools quickly and comfortably during machining operations. This angled tray design minimizes unnecessary bending and handling effort while improving workflow efficiency in high-production CNC environments. Fast tool identification and retrieval can significantly reduce machine downtime and improve setup productivity on the shop floor.

In addition to the upper tray, the bench model includes a spacious lower consumables tray for storing inserts, accessories, setup tools, measuring equipment, and maintenance items. The dual-tray design helps operators keep essential items organized and within easy reach, contributing to cleaner workspaces and improved 5S shop organization practices. Efficient tool storage systems play a major role in maintaining productivity and operational safety in CNC machining facilities.

The compact dimensions of approximately 20. x 30. x 12. make this bench model ideal for smaller workspaces, [benchtop tool organizer](#) applications, tool preparation areas, and machining cells where floor space optimization is important. Weighing approximately 48 lbs, the cart provides a stable and sturdy structure while remaining portable enough for flexible placement around CNC workstations.

Uratech is recognized for manufacturing a wide range of CNC tool storage systems, including ladder carts, step models, secured carts, maxi scoots, tooling scoots, and fully customized storage solutions for various CNC holder types. Their products are designed to improve organization, protect valuable tooling, and enhance manufacturing productivity across industrial machining operations.

Key Features of the 50 Taper CNC Tool Cart - Bench Model

- Compatible with CAT50, BT50, DV50, ISO50, and NMTB50 holders
- Heavy-duty 16-gauge cold-rolled steel construction
- Corrosion-resistant powder-coated finish
- Durable red nylon inserts for secure tool protection
- Ergonomic 15° inclined top tray for easy tool access
- Spacious lower tray for consumables and accessories
- Compact bench-style design ideal for limited spaces
- Stable 48 lb industrial-grade construction
- Designed for professional CNC machining environments
- Helps improve tool organization and workflow efficiency

The 50 Taper CNC Tool Cart - Bench Model is an ideal storage solution for CNC machine shops seeking a compact, durable, and efficient tooling organization system. Whether used beside machining centers, in setup stations, or inside tool rooms, this industrial-grade cart delivers dependable performance, improved accessibility, and long-term tool protection for demanding manufacturing applications.

Fast & Reliable Shipping Across North America & Worldwide

At Uratech, we ensure quick and reliable delivery to support uninterrupted machining operations. We offer same-day shipping across the USA, Canada, and Mexico, along with worldwide delivery for global customers.

Our products are stocked in New York, USA and Ontario, Canada, allowing faster order processing and reduced downtime for machine shops.

Warehouse Locations

USA: Uratech USA Inc, Lockport, New York

Canada: Uratech Tooling Technologies Inc, Waterloo, Ontario

About the Author

Uratech specializes in the design and manufacturing of CNC tool storage products and operates in two countries: in USA as Uratech USA Inc and in the Canada as Uratech Tooling Technologies Inc., We offer high-quality solutions to meet the needs of modern machine shops. Uratech is sincerely committed to providing customers with leading-edge technology.

Our primary objective is to meet or exceed customer expectations. We achieve this through efficient performance, quality workmanship, professionalism, competitive pricing, and on-time delivery. Above all, we emphasize the quality of work we deliver to fully satisfy our customers' needs. Products are stocked in New York, USA, and Ontario, Canada.

Orders from U.S. and Mexico customers are shipped from Uratech USA Inc., New York.

Orders from Canada and all other countries are shipped from Uratech Tooling Technologies Inc., Ontario.
